

AP100 Parachute Release Notes

Release Date:	2026.07.08
Aircraft Firmware:	v17.02.50.07
Remote Controller Firmware:	v01.64.08.20
AP100 Parachute Firmware:	v00.01.29.01
DJI Pilot 2 App Android:	v17.2.5.28
Update Method:	After installing the parachute on the aircraft, perform a consistency update or aircraft firmware update via the app or DJI Assistant 2. The aircraft firmware includes the parachute firmware.

* Make sure that the aircraft firmware, remote controller firmware, parachute firmware, and DJI Pilot 2 app are updated to the compatible versions. Otherwise, the product may not function properly.

What's New

- Added support for automatic and manual parachute deployment when used with DJI Matrice 400. For details, refer to the official parachute product page or user manual.
